Prominent Web Developer Releases New Book on '*E-Business Success*'

December 4, 2012 (Miami, FL) Author Kiah Graham has worked in the computer industry for over fifteen years and owns a successful IT consulting company. Now she taps into her experience in the first planned series of books to help small business owners succeed online.

Graham draws from her many experiences as an IT Consultant for small businesses. "I enjoy helping people develop an online presence with an effective and engaging website and also informing them on how to use technology to enhance their business processes," the author said. "There is much more that small business owners need to know about technology to connect all the dots that help them build a powerful online presence."

E-Business Success is an informative book that helps small business owners utilize technology effectively to enhance or improve their businesses. The book provides readers guidance on choosing a domain name, selecting a quality web developer, e-marketing strategies and developing a paperless office. "With the rapid changes in technology we all need a guide. Kiah's book will help you sort through the critical issues and offer you a road map for success. Don't just read the book. Use it!" says Andrew Morrison, president of the Small Business Camp.

About the Author

Kiah L. Graham, a native of Charleston, South Carolina, graduated from Florida A&M University in December 1995 where she earned a Bachelor's degree in Computer Information Systems with a minor in Business Administration. Ms. Graham also received her Webmaster Certification from Florida State University in 2003. In 2002, Sirius Web Solutions was born with the mission to provide high quality service at a reasonable price, to see clients as people not dollar signs, and use technology to help organizations and businesses achieve success.

Kiah has over 15 years in the computer industry and is well versed in various

programming languages, database management systems, and Internet technologies. Her work experience in both the public and private sector has given her insight on the keys to success in the Information Technology (IT) industry. By applying her extensive knowledge combined with her work experience in the IT industry, she was able to build a successful business and assist her clients in achieving e-business success.
